

Universal Messaging

Simple. Scalable. Real-time messaging.

Universal Messaging provides fast, guaranteed message delivery across all mainstream enterprise, Web and mobile platforms. Universal Messaging is the streaming solution of choice for financial markets where it has been benchmarked as the fastest universal messaging product on the market today.

Use the market-leading universal messaging platform for real-time streaming across enterprise, Web and mobile. Universal Messaging offers the first realistic alternative to the costly and cumbersome multi-product messaging architecture espoused by today's leading enterprise software vendors.

Key Benefits

Simplicity

The Universal Messaging platform eliminates the complexity and latency incurred by bridging multiple messaging systems. Multiple delivery channels and associated technologies are handled with a common foundation to move data quickly to anywhere you need it.

Performance

Universal Messaging is the fastest unified messaging product on the market, providing unsurpassed connectivity, high performance and low-latency delivery.

Flexibility

Count on no-compromise access to data via cross-compatible messages and through multiple delivery channels, supporting a market leading range of devices and platforms.

Features

Scalability

Scale applications as new delivery channels emerge and respond to the demands of new devices or protocols. Scale with any increase in user numbers or data volumes.

Multiple language APIs

Get full interoperability between client APIs of your choice across enterprise, Web and mobile.

Security

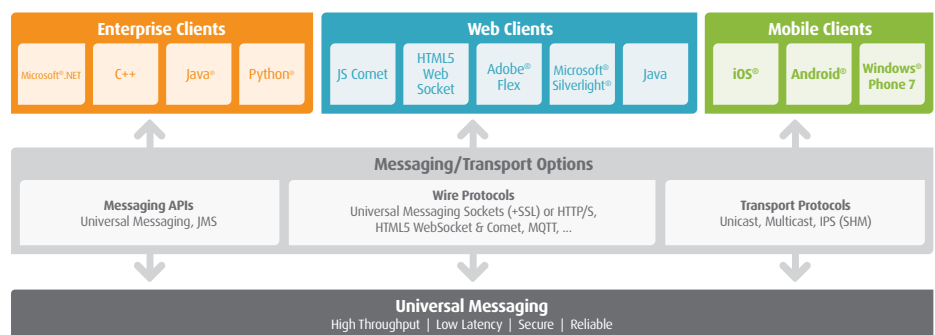

Communicate with a secure transactional system that includes encryption, pluggable authentication, and entitlements services that are battle hardened through powering the world's largest e-commerce trading systems for more than a decade.

High availability

Guarantee message delivery using transactional semantics and persistence, and deliver unsurpassed levels of availability with Universal Messaging's unique active/active clustering for distributed servers.

Multiple messaging paradigms

Choose the market-leading choice of messaging standards, wire protocols and transport options from a single solution.

Why Universal Messaging?

- A single solution for high-performance, low-latency messaging across a wide array of delivery channels, including all mainstream enterprise, Web and mobile platforms

Enterprise

- Delivering high-throughput, low-latency messaging for resilient, secure and highly scalable applications

Web and Mobile

- Designed from the ground up to provide real-time streaming to the edge of corporate networks and beyond
- Support for all of today's common Web and mobile platforms

Financial Market Highlights

- Streaming solution of choice for leading financial institutions
- Powers half of the Top 8 market-leading FX e-platforms
- Market-leading last-mile messaging solution for single-dealer platforms
- Powering leading trading systems for more than 10 years in all market conditions

Customer Spotlight
